Riverside, CA 92501-3348

**NOTICE OF PUBLIC HEARING**

For

**ORDER NO. R8-2007-0045**

for

Amending Order No. R8-2006-0010, NPDES No. CA0105279  
Waste Discharge And Producer/User Water Recycling Requirements  
(National Pollutant Discharge Elimination System Permit)

for

Inland Empire Utilities Agency  
Regional Water Recycling Plants, No. 1 and No. 4  
San Bernardino County

On the basis of preliminary staff review and application of lawful standards and regulations, the California Regional Water Quality Control Board, Santa Ana Region, proposes to amend Order No. R8-2006-0010, NPDES No. CA0105279 to include the additional source control provisions that the California Department of Health Services recommended for granting approval for the Chino Basin Recycled Water Groundwater Recharge Program. These provisions are currently included in water recycling requirements for the Recharge Program but are more properly a part of the discharge requirements for the Regional Water Recycling Plants No. 1 and 4.

The Board is seeking comments concerning the proposed waste discharge requirements and the potential effects of the discharge on the water quality and beneficial uses of the affected receiving waters.

The Board will hold a public hearing to consider adoption of the proposed waste discharge requirements as follows:

**DATE:** June 29, 2007  
**TIME:** 9:00 a.m.  
**PLACE:** City Council Chambers of Loma Linda  
25541 Barton Road  
City of Loma Linda

The Board's proposed Order, related documents, and all comments and petitions received may be inspected and copied at the Regional Board office, 3737 Main Street, Suite 500, Riverside, CA 92501-3348 ((951) 782-4130 by appointment scheduled between the hours of 9:00 a.m. and 3:00 p.m., Monday through Friday. Copies of the proposed Order will be mailed to interested persons upon request to Jane Qiu (951) 320-2008. The proposed Order can also be downloaded from our website at [http://www.waterboards.ca.gov/santaana/html/tentative\\_orders.html](http://www.waterboards.ca.gov/santaana/html/tentative_orders.html) starting May 29, 2007.

Interested persons are invited to submit written comments on the proposed Order No. R8-2007-0045. Interested persons are also invited to attend and express their views on issues relating to the proposed Order. Oral statements will be heard, but should be brief to allow all interested persons time to be heard. For the accuracy of the record, all testimony (oral statements) should be submitted in writing.

Although all comments that are provided up to and during the public hearing on this matter will be considered, receipt of comments by June 8, 2007 would be appreciated so that they can be used in the formulation of the draft Order that will be transmitted to the Board two weeks prior to the hearing. The draft Order may contain changes resulting from comments received from the public. To view and/or download a copy of the final draft requirements, please access our website at <http://www.waterboards.ca.gov/santaana/html/2007agendas.html> on or after June 18, 2007.

Any person who is physically handicapped and requires reasonable accommodation to participate in this Regional Board Meeting should contact Felipa Carrillo (951) 782-3285 no later than June 22, 2007. Please bring the foregoing to the attention of any person known to you who would be interested in this matter.

California Regional Water Quality Control Board  
Santa Ana Region

June 29, 2007

**STAFF REPORT**

**ITEM:**

**SUBJECT:** Amendment to Order No. R8-2006-0010, NPDES No. CA0105279, Waste Discharge and Producer/User Water Reclamation Requirements for the Inland Empire Utilities Agency Regional Water Recycling Plants No. 1 & No. 4 - Order No. R8-2007-0045

**I. DISCUSSION:**

On April 15, 2005, the Regional Water Quality Control Board (the Regional Board) adopted Order No. R8-2005-0033, prescribing Water Recycling Requirements for the Inland Empire Utilities Agency and Chino Basin Watermaster's Phase I Chino Basin Recycled Water Groundwater Recharge Project. The Project entails use of recycled water generated from the Inland Empire Utilities Agency's (IEUA) Regional Water Recycling Plants No. 1 and 4. Order No. R8-2005-0033 included source control requirements to implement conditions identified by the California Department of Health Services (CDHS) for approval of the Recharge Project. Order No. R8-2005-0033 also included a provision that specified that these source control requirements would become ineffective if and when waste discharge requirements for IEUA's RP-1 and RP-4 were revised to incorporate them. The source control requirements are more properly included in waste discharge requirements for RP-1 and RP-4 since the requirements already include pretreatment requirements, pursuant to the Code of Federal Regulations Title 40 Part 403.

On May 19, 2006, the Regional Board adopted Order No. R8-2006-0010, NPDES No. CA0105279, Waste Discharge and Producer/User Water Reclamation Requirements for the Inland Empire Utilities Agency Regional Water Recycling Plants No. 1 & No. 4 (RP-1 & RP-4). Order No. R8-2006-0010 superseded Order No. 01-01, the prior Order that regulated discharges from RP-1 & RP-4. Inadvertently, Order No. R8-2006-0010 did not include the source control requirements recommended by CDHS and incorporated in Order No. R8--2005-0033.

On May 10, 2007, IEUA requested that Order No. R8-2005-0033 be revised to include the Phase II Project of the Chino Basin Recycled Water Groundwater Recharge Program. During the review process for drafting the revised Order, it was determined that IEUA's Waste Discharge Requirements Order No. R8-2006-0010 should also be amended to incorporate the source control requirements that CHDS recommended and thereby consolidate all pretreatment-related requirements.

## **II. Proposed changes to the Order.**

Additions are bold and highlighted.

1. Order No. R8-2006-0010, Section VI.C.5.c. Provisions, page 27, add the following new paragraph No. 11:

**11. The Discharger shall operate the wastewater collection system under a comprehensive industrial pretreatment and pollutant control program for the control of discharge of toxic wastes from point sources. If the California Department of Health Services identifies any contaminants that may pose a risk of contamination to a drinking water supply, it may designate those contaminants for inclusion in the pretreatment and source control program requirements for IEUA to minimize the possibility that the influent wastewater to RP-1 and RP-4 will be contaminated with such toxic chemicals. The source control program shall include:**

- a. **An assessment of the fate of the specified contaminant compounds through the wastewater and recycled water treatment systems.**
- b. **A source investigation and monitoring program focused on the specified contaminants.**
- c. **An outreach program to industrial, commercial and residential communities within the sewage collection agency's service area to manage and minimize the discharge of compounds of concern at the source.**
- d. **A proactive program for maintaining an inventory of compounds discharged into the wastewater collection system so that new compounds of concern can be evaluated rapidly.**

## **II. WRITTEN COMMENTS**

Interested persons are invited to submit written comments on the proposed discharge limits and the staff report. Comments should be submitted by June 8, 2007, either in person or by mail to:

Jane Qiu  
California Regional Water Quality Control Board  
Santa Ana Region  
3737 Main Street, Suite 500  
Riverside, CA 92501-3348

## **III. INFORMATION AND COPYING**

Persons wishing further information may write to the above address or call Jane Qiu of the Regional Board at (951) 320-2008. Copies of the application, proposed waste discharge requirements, Fact Sheet, and other documents (other than those which the Executive Officer maintains as confidential) are available at the Regional Board office for inspection and copying between the hours of 9:00 a.m. and 3:00 p.m., Monday through Friday (excluding holidays).

## **IV. REGISTER OF INTERESTED PERSONS:**

Any person interested in a particular application or group of applications may leave his/her name, address, and phone number as part of the file for an application.

## **V. PUBLIC HEARING:**

The Regional Board will hold a public hearing regarding the proposed waste discharge requirements as follows:

DATE: June 29, 2007  
TIME: 9:00 a.m.  
PLACE: City Council Chambers of Loma Linda  
25541 Barton Road  
City of Loma Linda, California

**RECOMMENDATION:**

Adopt Order No. R8-2007-0045, amending Order No. R8-2006-0010, NPDES No. CA0105279, as presented.

ORDER NO. R8-2007-0045

Amending Order No. R8-2006-0010, NPDES No. CA0105279  
Waste Discharge and Producer/User Reclamation Requirements

for

Inland Empire Utilities Agency  
Regional Water Recycling Plants No. 1 & No. 4  
San Bernardino County

The California Regional Water Quality Control Board, Santa Ana Region (hereinafter, Board), finds that:

1. On May 19, 2006, the Regional Water Quality Control Board (the Regional Board) adopted Order No. R8-2006-0010, NPDES No. CA0105279, prescribing Waste Discharge and Producer/User Water Reclamation Requirements for the discharge of tertiary treated and disinfected wastewater from Inland Empire Utilities Agency's (IEUA) Regional Water Recycling Plants No. 1 and No. 4 to tributaries of Reach 3 of the Santa Ana River. Order No. R8-2006-0010 included pretreatment requirements that implement Title 40 Part 403 of the Code of Federal Regulations for controlling pollutants which pass through or interfere with the treatment process in publicly owned treatment works or which may contaminate sewage sludge.
2. On April 15, 2005, the Regional Board adopted Order No. R8-2005-0033, prescribing Water Recycling Requirements for the use of recycled water generated from IEUA Regional Water Recycling Plants No. 1 and 4 (RP-1 & RP-4) for the Phase 1, Chino Basin Recycled Water Groundwater Recharge Project. Order No. R8-2005-0033 included source control requirements that were recommended by the California Department of Health Services (CDHS) to minimize the possibility of the presence of toxic chemicals in the influent stream to RP-1 & RP-4. The inclusion of these source control requirements into the pretreatment requirements of Order No. R8-2006-0010 was inadvertently omitted.
3. On April 27, 2007, CDHS issued the Findings of Fact and Conditions for IEUA's Phase 2 Chino Basin Recycled Water Groundwater Recharge Project. The same source control provisions identified for approval of the Phase 1 Project were included in the conditions for granting approval for the Phase 2 project.
4. It is appropriate to amend Order No. R8-2006-0010 to include the source control provisions recommended by the CDHS in granting approval for both the Phase 1 and Phase 2 Chino Basin Recycled Water Groundwater Recharge Project.

5. In accordance with Water Code Section 13389, issuance of the waste discharge requirements for this discharge is exempt from those provisions of the California Environmental Quality Act contained in Chapter 3 (commencing with Section 21100), Division 13 of the Public Resources Code. The Program Environmental Impact Report (EIR) for the Recycled Water Feasibility Study was certified and approved by the IEUA Board of Directors on June 28, 2002.
6. The Board has notified the discharger and other interested agencies and persons of its intent to amend waste discharge requirements for the discharge and has provided them with an opportunity to submit their written views and recommendations.
7. The Board, in a public meeting, heard and considered all comments pertaining to the discharge.

**IT IS HEREBY ORDERED** that Order No. R8-2006-0010 be amended as follows:

1. Order No. R8-2006-0010, Section VI.C.5.c. Provisions, page 27, add the following new paragraph No. 11:
  11. The Discharger shall operate the wastewater collection system under a comprehensive industrial pretreatment and pollutant control program for the control of discharge of toxic wastes from point sources. If the California Department of Health Services identifies any contaminants that may pose a risk of contamination to a drinking water supply, it may designate those contaminants for inclusion in the pretreatment and source control program requirements for IEUA to minimize the possibility that the influent wastewater to RP-1 and RP-4 will be contaminated with such toxic chemicals. The source control program shall include:
    - a. An assessment of the fate of the specified contaminant compounds through the wastewater and recycled water treatment systems.
    - b. A source investigation and monitoring program focused on the specified contaminants.
    - c. An outreach program to industrial, commercial and residential communities within the sewage collection agency's service area to manage and minimize the discharge of compounds of concern at the source.
    - d. A proactive program for maintaining an inventory of compounds discharged into the wastewater collection system so that new compounds of concern can be evaluated rapidly.

2. All other conditions and requirements of Order No. R8-2006-0010 shall remain unchanged.

I, Gerard J. Thibeault, Executive Officer, do hereby certify that the forgoing is a full, true, and correct copy of an order adopted by the California Regional Water Quality Control Board, Santa Ana Region, on June 29, 2007.

---

Gerard J. Thibeault  
Executive Officer
